## More ON PHOTOSHOP CC

Q Answer the following:-

Q1. What is the use of Painting Tools?  
Name any five painting tools.

Ans A Painting tool is used to simply do painting in effective way and creative way of any image of its background, etc.

Five painting tools are:-

- i) Brush tool.
- ii) Pencil tool
- iii) ~~Color~~ Replacement tool.
- iv) Mixer Brush tool.
- v) Spat Healing Brush tool

Q2. Differentiate between the Spat Healing Brush tool and healing tool.

Ans Spat healing tool repair imperfection without defining source point but Healing tool requires a source point through

which it takes color and fills it in Imperfective areas.

Q3 What is the use of hue/saturation dialog box.

Ans ~~that~~ With the help of hue / Saturation dialog box we can set colour intensity easily or can adjust it easily.

Q4. What is the use of Mixer brush tool?

How can you apply it to an image?

Ans This tool allows us to paint like realistic it can mix colours on background or ~~anywhere~~ you want and helps us to give realistic feature in image.

\* To apply it on image follow the steps:-

i) right click on Brush tool → mixer Brush tool from tools panels.

ii) Select the source paint by pressing Alt → You can select Foreground or background colour to which you want to mix.

iii) Drag your pointer from image where you want to fill with mixture.

Q 5. What do you understand by the wrapping of text?

Ans Wrapping of text simply means folding and changing text's shape.

Q 6. Explain the utility of Content-Aware move tool.

Ans It is used to select or move any part of image to another area within same image. without the use of layer and mask.

Q 7. What do you understand by layers?

Ans Layers are the transparent sheets that hold objects and are stacked on top of each other.
